7. (Amended) An interactive display system as claimed in claim 1, in which the pointing device (16) is operable to induce image control signals in the position indication means, which image control signals are operable to control the computing means (12) and thus image information is displayed on the display means (10).
 8. (Amended) An interactive display system as claimed in claim 1, in which the pointing device (16) is arranged to take precedence over the or each remote signalling device (18).
 9. (Amended) An interactive display system as claimed in claim 1, in which the pointing device (16) is operable to selectively enable the or each remote signalling device (18).
 10. (Amended) An interactive display system as claimed in claim 1, in which the display device (10) includes an output portion arranged to transmit signals from both the receiver portion (20) and the position indication means to the computing means (12).
 11. (Amended) An interactive display system as claimed in claim 1, in which the or each remote signalling device (18) is operable to transmit signals to the receiver portion (20) only in response to a request signal from the display means (10).
 12. (Amended) An interactive display system as claimed in claim 1, in which where a plurality of remote signalling devices (18) are provided, the display means (10) requests information from each remote signalling device (18) in turn, by polling.
 13. (Amended) An interactive display system as claimed in claim 1, in which the or each remote control device (18) is operable to control the computing means (12) in substantially the same manner as a key board and mouse combination
 14. (Amended) An interactive display system as claimed in claim 1, in which the system comprises one master control device which is a remote control device (18) or a pointing
